

**EXPERIENCE THE JOY OF  
POWERFUL COOLING**

## ADOPTING SUSTAINABILITY FOR OUR FUTURE GENERATIONS

### MISSION

#### Living together for our future

Through innovation and technology, we deliver a brighter future with peace of mind to our customers and societies around the world.

SDGs AND GENERAL SHARE THE SAME BELIEF

#### SDGs (United Nations) No one will be left behind

We aim for a future in which people can continue to live affluently and peacefully on the planet through cooperation.

### GROWTH STRATEGY

**Power of monozukuri**  
World and industry first technologies

**Expansion of partnership**

**Global business development**  
Business in more than 100 countries worldwide

### STRENGTHS OF GENERAL

#### Intellectual Capital

Since our founding, we have created world and industry firsts through our value-creation capabilities.

#### Air Conditioners

- Simple-mounting cassette-type cooler (Industry's first)
- Air conditioner with automatic filter cleaning function (World's first)
- Air conditioner with hybrid airflow (World's first)

#### Manufacturing Capital

Global production and R&D bases for innovation and technology

#### Human Capital

Human resources supporting innovation and technology

- Self-motivated talent development
- Empowering of monozukuri (manufacturing) "Technical Academy"

#### Social and Relationship Capital

Expanding and joint development\* of business areas by strengthening cooperation.

\*As on March 2022

### PROMOTION OF SUSTAINABLE MANAGEMENT

Planet

Our people

Society

## WHAT WE CAN DO BECAUSE WE ARE GENERAL

### MANAGEMENT THAT CONSIDERS SUSTAINABILITY OF SOCIETY

- Considering the significance of SDGs and looking beyond our current core business, promote initiatives for the creation of innovation and respond to cutting-edge technologies.
- Investment of management resources and concentration of capital with an eye on the future.

#### An Example of our Initiative

- Development and sales expansion of products certified as **Sustainable Product**.

### TOGETHER, TOWARDS A SUSTAINABLE FUTURE THAT ONLY GENERAL CAN OFFER

# CREATING A LIFE CONDITIONER

At GENERAL, we have always assessed changes in the global environment before taking action. Working to create a better future with a peaceful and comfortable society, living in harmony with abundant nature, glowing smiles of healthy children, that's our idea of the new normal. And we're up for the challenge. We continue to refine the air conditioning technologies we've developed. A craft of manufacturing born in the pursuit of perfection, featuring innovation unbound by convention. Advancing to our next stage, we aspire to support and protect life, creating value we can all value. Through Japanese technology, we will ardently support society, nature and the future. From air to life, creating a life conditioner.

## UPGRADE TO THE NEXT LEVEL

Presenting the ultimate air conditioner from GENERAL, designed to deliver exceptional cooling at extreme temperatures with CPTA™ (Cooling Power for Tropical Application) technology, and suitable for cooling large sized rooms with its 25m Long-reach airflow. At the same time, delivering a highest part load efficiency of 6.60 EER, and capable of meeting the energy efficiency level (ISEER) as per new BEE regulation. What's more, every GENERAL is built to last longer. So choose wisely, to experience the next level of performance.

## CREATION OF COMFORT

GENERAL creates high-quality and environment-friendly products that provide good comfort in accordance with our vision to 'Create a comfortable environment' by utilizing air conditioning technology and creativity we have fostered over many years.

### High Quality Development and Production Environment

The Headquarters and R&D Centre is equipped with a wide range of testing equipment envisioning a variety of operating conditions. This includes a testing tower with a 60m height difference for buildings. We provide high quality and reliable products that meet the customer's needs from all over the world through our advanced R&D centres and manufacturing facilities.

All GENERAL factories have acquired ISO 9001 and have built a quality control system common around the world. High quality products are offered all over the world based on stringent quality inspections.

### ISO Certifications

ISO 14001 is the standard defined by the International Organization for Standardization (ISO) related to environmental management systems. GENERAL HVAC Solutions America, has been acknowledged by an internationally accredited compliance organization as having an appropriate program of environmental protection procedures and activities to meet the requirements of ISO 14001. The air conditioners manufactured by GENERAL have received ISO 9001 series certification for quality assurance.

### RoHS Compliant

GENERAL participates in the RoHS Directive, which is the Restriction of Hazardous Substances in electrical and

electronic equipment. It is an EU directive intended to protect the environment by forcing manufacturers to eliminate or severely curtail the use of cadmium, hexavalent chromium, and lead, in all products from automobiles to consumer electronics.

### Receiving Inspection

Parts procurement requires a supplier's test report. European regulation RoHS inspection is also performed by a special in-house test department. A number of inspections are performed especially on main parts to remove defective products.

### Stringent Product Quality Inspection

Stringent quality inspection is carried out at all production processes. High quality is maintained by stringent checks by inspectors and repetitive inspections.

## ENVIRONMENTAL MANAGEMENT SYSTEM

GENERAL strives for business activities that achieve harmony between contributing to protecting the global environment and company activities while making environmental protection activities, an important issue in company management. GENERAL is working to improve its environment friendliness by building an Environmental Management System (EMS) - taking environmental protection measures throughout the product life cycle of materials procurement, product development and design, manufacturing, and recycling; and by taking the environment into consideration

during business activities such as saving energy, resources and reducing waste.

Moreover R32 is the refrigerant used in all the products. R32 is a refrigerant with zero ozone depletion potential (ODP) and a significantly lower global warming potential (GWP). Compared to previously used refrigerants, R32 is a more environmentally friendly option due to its lower impact on climate change.

## AWARDS AND CERTIFICATIONS

**LUXURIOUS &  
SYMMETRIC  
DESIGN**

## TROPICAL INNOVATION INVERTER SERIES IN A SYMMETRIC DESIGN

**INNOVATION  
IN  
TECHNOLOGY**

## NEW TECHNOLOGY FOR SUPERIOR PERFORMANCE

- ❶ Dual suction intake
- ❷ New long cross-flow fan
- ❸ New high output BLDC fan motor
- ❹ Powered dual louvers

Optimized Airflow Design

- ❶ Dual suction intake

- ❸ New high output BLDC fan motor

Produces high power, wide operation range and high efficiency.

- Increase in motor efficiency
- Lesser vibration
- Lower noise

- ❷ New long cross-flow fan

- ❹ Powered dual louvers

25 METRES  
LONG REACH  
AIRFLOW

The cold air discharged is directed upward by the special designed louvers, which achieves the coanda airflow along the ceiling, producing long reach airflow of 25m\*, making it possible to cool every corner of a big room immediately.

6 Speed Fan Control

5 speed + Powerful cooling mode

\*One touch powerful cooling mode: Continuous operation for 30 minutes at maximum air volume.

Powerful Operation

Thirty minutes of continuous operation by maximising airflow allows the temperature to reach optimum levels. Rapid cooling makes the room comfortable quickly.

Cooling time in powerful mode is shorter than in normal mode

mode

# COOLING POWER FOR TROPICAL APPLICATION - CPTA™ TECHNOLOGY

## POWERFUL COOLING

GENERAL Air Conditioners are tropically designed to perform at ambient conditions as high as 55°C. Housed in larger outdoor units, the machines carry high output compressors with large copper heat exchangers and large propeller fans to ensure powerful cooling. All the models are designed to deliver higher cooling capacity than the rated cooling capacity.

EXPERIENCE THE JOY OF POWERFUL COOLING EVEN  
**25 METRES\* AWAY**

### CEA Series

CEA series models achieve over 80% cooling capacity even at 52°C by using larger indoor/outdoor units with tropical compressors, and higher airflow to improve cooling performance at higher temperature. They can operate even at 55°C.

### CGA Series

CGA series models are able to achieve over 80% cooling capacity even at 49°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 55°C.

### CGW Series

CGW series models are able to achieve over 80% cooling capacity even at 48°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 52°C.

### CPW Series

CPW series models achieve over 80% cooling capacity even at 46°C by using a new heat exchanger designed to have high cooling performance. They can operate even at 55°C.

### CNW Series

CNW series models achieve over 80% cooling capacity even at 46°C by using a new heat exchanger designed to have high cooling performance. They can operate even at 55°C.

Note: 80% Cooling capacity is measured based on indoor temperature 27°C DB and 19°C WB, and higher outdoor temperatures as mentioned above. For the respective series.

**CKW Series**

CKW series models are able to achieve over 80% cooling capacity even at 46°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 52°C.

**KJT Series**

KJT series models achieve over 80% cooling capacity even at 49°C (18/24k models) by optimizing the components for high cooling performance. They can operate even at 55°C.

**BUT Series**

BUT series models are able to achieve over 80% cooling capacity even at 48°C by optimizing the components for high cooling performance. They can operate even at 52°C.

**NMW Series**

NMW series models are able to achieve over 80% cooling capacity even at 48°C by optimizing the components for high cooling performance. They can operate even at 52°C.

**BMA Series**

BMA series models are able to achieve over 80% cooling capacity even at 48°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 52°C.

Note: 80% Cooling capacity is measured based on indoor temperature 27°C DB and 19°C WB, and higher outdoor temperatures as mentioned above. For the respective series.

**CRT Series**

CRT series models are able to achieve over 80% cooling capacity even at 46°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 55°C.

**BRT Series**

BRT series models are able to achieve over 80% cooling capacity even at 46°C because the indoor unit and outdoor unit components are optimized in order to improve cooling performance. They can operate even at 52°C.

**CHA Series**

CHA series models are able to achieve over 80% cooling capacity even at 46°C by optimizing the components for high cooling performance. They can operate even at 52°C.

**BBA Series**

BBA series models are able to achieve over 80% cooling capacity even at 46°C by optimizing the components for high cooling performance. They can operate even at 52°C.

Note: 80% Cooling capacity is measured based on indoor temperature 27°C DB and 19°C WB, and higher outdoor temperatures as mentioned above. For the respective series.

### ISEER UPGRADE

Top of the line energy efficiency of ISEER 5.61 that exceeds 5 Star rating requirement as per BEE, making it highly energy efficient.

Indian Seasonal Energy Efficiency Ratio (ISEER)

### HIGH ENERGY SAVING

Top class energy saving is achieved by high efficiency Lambda heat exchanger, large cross flow fan, new efficient compressor, large propeller fan and R32 refrigerant.

Lambda heat exchanger    New long cross-flow fan    Large propeller fan    New efficient compressor    Eco-friendly Refrigerant

### HIGH DENSITY MULTI-PATH HEAT EXCHANGER

Heat transfer ability is substantially improved by the high-density heat exchanger and multi-path tube arrangement. High performance grooved piping with expanded heat exchanger area is used for better heat transfer.

## TROPICAL DESIGN

## TROPICAL ROTARY COMPRESSOR

Eco-friendly  
Refrigerant

Tropical  
Rotary Compressor

Gas leak protection and low voltage protection OLP (Overload Protection) device installed

High durability crankshaft with hardness improved by adding a coating

High durability rolling piston with hardness improved by changing the material

Complete protection against abnormal temperature rise, thermal protector and abnormal pressure rise

High efficiency, high-output torque motor. Torque improved by increasing the thickness of the laminated core and improving the coil winding

High durability vane. Surface hardness increased

## TROPICAL SPEC

### Super eco-friendly

Compressor based on Eco-friendly R32 refrigerant cools even at higher ambient temperature of 55°C.

### Super powerful

10% more capacity than old models under overload condition.

### Super low voltage operation

Our Tropical Compressor can be operated even at a low voltage of 145V.

### Super Hi-Efficiency

Fulfills star rating requirements of 2026.

### Super quiet compressor

Reduced compressor noise due to better lubrication at high temperature and frictionless parts along with compressor insulation jacket.

## OPTIMISED AIRFLOW

## COANDA AIRFLOW

With advanced airflow technology, GENERAL provides powerful airflow and better air distribution for corner to corner cooling. The cold air discharged is directed upward, which achieves the Coanda airflow along the ceiling, producing Long-reach airflow.

### Cooling: Healthy Horizontal Airflow

Cold air is discharged upward by the Coanda effect (discharge along a surface) and it is delivered far away along the ceiling. Cool air reaches every part of even a large room.

- Healthy because air does not cool the feet
- Comfortable because the occupants are not directly exposed to the airflow
- Cool air reaches a long distance

## SAVES ENERGY THROUGHOUT THE YEAR

By making all the motors DC, electricity loss is decreased and power consumption is substantially reduced. In addition, high-speed fan motor rotation is possible, heat exchange efficiency is increased and annual power consumption amount is saved by increasing the airflow.

## DC TWIN ROTARY COMPRESSOR

The high efficiency DC inverter type twin cylinder rotary compressor is used for our product range. It achieves higher energy efficiency compared with similar compressors by optimizing the structure inside the compressor.

## DC FAN MOTOR

DC Fan Motor produces high power, wide operation range and high efficiency.

Note: Available in select models.

## SINEWAVE DC INVERTER CONTROL

High efficiency operation is realized by using Sinewave DC inverter control. This promotes the effective use of the input power supply to attain high performance.

## ADVANCED FREQUENCY MODULATION TECHNOLOGY

Advanced Frequency Modulation (AFM) Technology reduces the effects of magnetic flux by vector control technology, and improves the efficiency of the compressor by increasing its maximum speed and decreasing its minimum speed. With this technology, further miniaturization, higher efficiency and better performance is attained.

## ALL DC INVERTER TECHNOLOGY

### WHAT IS AN INVERTER AIR CONDITIONER?

INVERTER is an equipment that controls the electrical voltage, current and frequency of the compressor motor in an air conditioner.

An INVERTER Air Conditioner changes the speed of the compressor by varying the frequency of the power supply to give superior cooling.

When an INVERTER Air Conditioner is switched on, the compressor runs at high speed for quick cooling. But once the set temperature is reached, the air conditioner enters 'energy saving mode' by reducing the compressor speed. Thus, effectively reducing its power consumption in order to save energy.

### FULL INVERTER TECHNOLOGY

GENERAL INVERTER Air Conditioners are built with compressors with advanced frequency modulation technology that run at speeds as low as 25% to as high as 110% when quick cooling is required, and consume less power under part-load conditions.

### FASTER COOLING AND COMFORT CONTROL

INVERTER ACs take nearly half the time to reach the set temperature and precise control of room temperature is also attained.

Starting point: Set temperature: 24°C, Operation Time: 3 hours, Indoor: 35°C, Outdoor: 35°C (For 12000BTU/Hr model)

# PURSUIT OF SEASONAL EFFICIENCY

## PART-LOAD OPERATION

In over 80% of actual operation time, air conditioners are operated at partial capacity instead of rated capacity. We focused on high seasonal efficiency with an all DC inverter control and high efficiency technology.

## PART-LOAD EFFICIENCY

More power saving can be achieved by these inverter air conditioners as they operate with higher efficiency under part-load conditions.

50% Load Efficiency for CEA Series

50% Load Efficiency for CGA Series

50% Load Efficiency for CGW Series

50% Load Efficiency for CPW Series

50% Load Efficiency for CNW Series

50% Load Efficiency for CKW Series

50% Load Efficiency for KJT Series (Cooling)

50% Load Efficiency for CRT Series

50% Load Efficiency for CHA Series

## EXTREME VOLTAGE RANGE (145V~285V)

The upper limit of the operating voltage range is further increased to accommodate unstable voltage conditions. Additionally, high voltage safety protection is added to make the PCB more resilient.

Note: Available in CPW, CNW & CKW Series models.

## WITHSTANDS HIGH VOLTAGE AT 700V

The newly developed PCB is designed to withstand high voltage upto 700V for 50 ms. The design is highly robust and provides additional protection to the PCB.

Note: Available in CEA, CGA, CHA and BBA Series models.

## BLUE FIN CONDENSER & EVAPORATOR

### ANTI-CORROSION HEAT EXCHANGER WITH BLUE FIN FOR LONG LIFE

Blue fin treatment of the condenser and evaporator offers improved corrosion resistance and longer life of the heat exchanger. Adoption of cobalt blue coating for the fins in the heat exchanger provides protection against rust and salt damage.

Blue Fin Condenser

-  Cobalt Blue protection
-  Aluminium base material
-  Standard chromate protection
-  Hydrophilic coating

Blue Fin Evaporator

Note: Blue Fin condenser available in all models. Blue Fin Evaporator is available in CGW, CKW, BUT, NMW, BMA, CRT and BRT Series.

## ANTI CORROSION EVAPORATOR

### ANTI-CORROSION COPPER HEAT EXCHANGER

The copper heat exchanger in the indoor unit offers high resistance against corrosion of the evaporator coil with an anti-corrosive epoxy resin coating.

Epoxy Resin Coating

Note: Available in CEA, CGA, CPW, CNW and KJT series.

## HIGH DURABILITY PCB

## SILICON / CONFORMAL COATED PCB

Special Silicon / Conformal coating on the PCB protects the surface from dust, dirt, water and humidity ensuring long life and smooth operation.

Special Silicon / Conformal Coating

Note: Available in all models.

## PM 2.5 FILTER

## PM 2.5 FILTER

Cleans the air by catching particles as small as  $0.3 \sim 2.5 \mu\text{m}$ .

- PM 2.5 is a general term for micro-particulate matter less than  $2.5 \mu\text{m}$ .
- Life of filter: 6 months
- Additional PM 2.5 filter part number:  
CEA series models & ASGG30KJTA: UTR-FA16-6  
CGA, CPW, CNW series &  
ASGG18/24KJTA models: UTR-FA16-4

Note: PM 2.5 filter is available in CEA, CGA & KJT series models.  
PM 2.5 filter is an optional part for CPW, CNW & CKW series models.  
Required to install two filters per unit.

## HOW TO INSTALL THE FILTER

## GROUP CONTROL SYSTEM

A number of indoor units can be operated at the same time using a single wired remote controller. When connecting different types of indoor units (such as wall mounted, cassette, duct or other types), some functions may be restricted.

Connect multiple indoor units in a system with a total wiring length of the remote controller cable upto 500m.

| Total wiring length of remote controller cable (A+B+C+D+E) | Cross section of cable   |
|------------------------------------------------------------|--------------------------|
| ≤ 500m                                                     | 0.3~1.25 mm <sup>2</sup> |

Note: 1. Group control cannot be used together with Wireless LAN adaptor. If IoT function is enabled, group control is not possible.  
2. Group control feature is available in KJT series models.

## GROUP REMOTE CONTROLLER

High visibility and easy operation. Room temperature can be accurately controlled using the built-in thermo sensor.

Communication kit UTY-TWRXZ2 is necessary for installation. Non-polar 2-core wire is to be used for connection.

Wired Remote Controller  
UTY-RLRG

\*Optional

## SELF DIAGNOSIS

Enables automatic error detection in the unit for easy troubleshooting. When an error is detected, the error code number can be checked using the remote controller display to identify the issue. The lamp on the indoor unit will output error codes by way of blinking patterns.

## HOW TO USE SELF DIAGNOSIS

If [ ] and [ ] blink while [ ] is blinking fast on the indoor unit, check the error code. The error code is 2-digit numbers or characters.

1. Press down [ ] for more than 5 seconds.

The remote controller will enter the service check mode and “—” will be shown.

2. Press SELECT SELECT to change the shown error code. By pressing and holding, the error code changes every 0.5 second. The indoor unit emits 1 short beep each time the error code changes. When the corresponding error code is shown, the indoor units emit multiple beeps and all the indicator lamps on the indoor unit blink.

| The characters used for error code |   |  |   |  |   |
|------------------------------------|---|--|---|--|---|
|                                    | A |  | C |  | F |
|                                    | J |  | P |  | U |

To finish the services check mode, press. The remote controller will return to the original display. Tell the error code to authorised service personnel when consulting them. If the indoor unit emits multiple beeps at “00”, no error is detected.

Note: Available in CEA, CGA, CGW, CPW, CNW, CKW, KJT, BUT, NMW, BMA, CRT, BRT and CHA series models.  
Please refer operating manual for further details.

## 3D DOUBLE AUTO SWING

### 3D DOUBLE AUTO SWING

#### 30 Step Control

A combination of right/left and up/down directional swing airflow 3-dimensional air direction control with upto 30 unique configurations, which enables precise wind direction control for corner to corner cooling.

Note: 3D Double auto swing is available in CEA, KJT, BUT, NMW, BMA series, 18/24CGA, 18/24CGW, 18/24CPW, 22CNW and 24CKW models. 30 Step control is available in select models.

## ANTI-DRIP DESIGN

### DEW DRIP PREVENTION

The indoor unit louver has been redesigned with a ribbed surface to have less possibility of dew condensation on it. There is an option of disabling the louver return function in the new models.

Note: Available in select models.

### BACKLIGHT SYSTEM

Backlight display on wireless remote controller enables easy operation in a darkened room, improving visibility in low light environments. The screen lights up when any button is pressed on the remote controller.

Note: Available in CEA, CGA, CGW, KJT, CPW, CNW, CKW, BUT, NMW, BMA, CHA & BBA series models.

### 0.5°C PRECISION TEMPERATURE CONTROL

Precision temperature control allows setting the desired temperature in increments of 0.5°C for more accurate temperature setting. Increments in steps of 0.5°C enables a more accurate temperature threshold leading to a more comfortable feeling for the user.

Note: Available in CEA, CGA & KJT series models.

## ENERGY SAVING BY HUMAN SENSOR

Human sensor catches movements of people in a room, and operates with lower capacity if there is no one in the room for approximately 20 minutes, enabling additional energy saving. When people come back to the room, it automatically returns to the previous operating mode.

Note: Available in CGA and KJT series models.

## INTEGRATED ON – OFF TIMER

You can set an integrated ON-OFF or OFF-ON timer that's suitable for your lifestyle. Setting time: Adjust timer setting for 1 minute at a time, eg., 18:30, 31, 32...

From wake-up to go to work

Note: Available in select models.

From sleep to wake-up

## OUTDOOR UNIT LOW NOISE OPERATION

The outdoor unit low noise operation lowers noise from the outdoor unit. During this operation, the rotation speed of the compressor decreases and the outdoor unit fan rotates slowly. The setting is preserved even if the air conditioner is turned off.

Remote controller with "Outdoor low noise" function

Note: 1. Available in CGA & KJT series models.  
2. If the wired remote controller (optional) is connected, this function is restricted.

## 10°C HEAT OPERATION

10°C Heat operation maintains the room temperature at 10°C, so as to prevent the room temperature from dropping too low when not occupied. Thereby, comfort level is enhanced by controlling the room temperature quickly after returning home as well as reducing power consumption while nobody is at home. Also, when nobody is at home for a long time, the room temperature can be maintained by "10°C heat" function to prevent the furniture from freezing.

Remote controller with "10°C Heat" function

Note: 1. Available in KJT series models.  
2. If the wired remote controller (optional) is connected, this function is restricted.

## ECONOMY MODE

This mode saves more electricity than other operation modes by changing the set temperature to a moderate setting. In the Cooling, Heating or Dry mode, the maximum output of this operation is approximately 70% of its usual operation.

| Operation mode | Room temperature                            |
|----------------|---------------------------------------------|
| Cooling / Dry  | Few degrees higher than the set temperature |
| Heating        | Few degrees lower than the set temperature  |

Note: Available in CGA, CGW, CPW, CNW, CKW, NMW, BMA, KJT, CRT and BRT series models.

## 24°C DEFAULT TEMPERATURE SETTING

The Bureau of Energy Efficiency has mandated default setting of 24°C for air conditioners with the objective of conserving energy. Therefore, when the air conditioner is switched on, it will have a preset temperature of 24°C. However, the user can set the air conditioner at a lower or higher temperature as per their preference. It is estimated that every 1°C increase in the set temperature saves about 6% of electricity. Typically, room temperature is set between 20-21°C whereas, as per standard comfort conditions, ideal temperature is 24-25°C. Considering the change from 20°C to 24°C, there is potential to increase at least 4°C, which will lead to savings of about 24% of electricity.

Overall potential for energy conservation through such measures is estimated to the tune of 20 billion units (worth ₹10000 crores) annually, which is equivalent to reduction of 16.4 million tonnes of CO<sub>2</sub> per year.

Note: Available in all models. For more details, visit [beeindia.gov.in](http://beeindia.gov.in)

## BEST IN CLASS WARRANTY & FREE INSTALLATION

GENERAL offers a 10 year warranty on Inverter Compressor and a 5 year warranty on Inverter outdoor PCB. Company authorised and monitored free standard installation is offered on all cassette, split and inverter window air conditioners for assured product performance, and bringing down the overall cost of ownership.

**10

Terms & Conditions apply. 10 years warranty on inverter compressor is on select models and includes 5 years standard warranty & 5 years extended warranty. 5 years warranty on inverter PCB is for the outdoor unit on select models and includes 1 year standard warranty & 4 years extended warranty. To avail extended warranty – a) Registration of product within 30 days of purchase & installation by authorised service partner is mandatory and subject to verification by the company; & b) Servicing & maintenance of product during warranty period at a nominal cost by authorised service partner is mandatory. For product registration, call 1860 2081 007 / 044 66222100 or WhatsApp 6379 881 007 or register through our GENERAL Air Conditioner Customer Mobile App. Extended warranty is valid against installation by authorised service partner and subject to verification by the company. 3 Metres piping kit is available in select models. Please check applicability of warranty and installation offers at the time of purchase of product. Refer warranty card for more details.

## EXTENDED COMPREHENSIVE COVER (ECC)

GENERAL offers an optional Extended Comprehensive Cover (ECC) for just ₹6990 (incl. GST) for a period of 4 years after the completion of the 1st year comprehensive cover. The customer is entitled to avail 8 free periodic maintenance services over the next 4 years. The ECC also covers all critical parts, gas charging and offers free service visits in case of breakdown. Absolute peace of mind and long lasting performance for ₹4.79 per day only. Opting for ECC at the time of purchase not only ensures priority service through GENERAL's wide service network and skilled manpower, but also prompt availability of genuine spare parts to safeguard the product for longer lifespan and optimum performance. Choose wisely and opt for ECC for your product.

For detailed terms & conditions regarding ECC, please scan QR code.

**IoT READY\***

## OPERATION FROM ANYWHERE

Using the Internet of Things (IoT), GENERAL actively provides services that allow users to control air conditioners from their smartphones. By using our Wireless LAN Interface and AIRSTAGE Mobile App, you can control your home's cooling and heating anytime from anywhere. With a new UI/UX interface and more functions, the new AIRSTAGE Mobile App makes using the air conditioner a breeze.

## VOICE CONTROL

You can now operate your air conditioner with just a voice command using a smart speaker compatible with Google Home or Amazon Alexa.

## WIRELESS LAN INTERFACE

The exclusive Wireless LAN adapter (optional accessory) enables you to operate the air conditioner by smart phone or tablet PC from outside.

Wireless LAN Adapter  
UTY-TFSXH3

Note: This feature is available in CEA, CGA & KJT series models.

## AIRSTAGE Mobile

AIRSTAGE Mobile App is an application software that enables you to operate your GENERAL air conditioner with a mobile device or a smart speaker and control your home's climate anytime, anywhere!

## USER FRIENDLY INTERFACE

User friendly screen display facilitates easy operation.

Note: AIRSTAGE Mobile App can be used only if the Wireless LAN adapter is installed.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit. \*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 91 for specific model-wise features.

# TROPICAL INVERTER - HOT & COLD

## KJT Series

Star Rating:

Model Number:

ASGG18KJTA-B

ASGG24KJTA-B

ASGG30KJTA-B

Tropical Product Design

Double Swing Automatic-3D Airflow

Energy Saving With Human Sensor

Anti-Corrosion Copper Heat Exchanger

Evaporator Epoxy Resin Coating Blue Fin Condenser

Full Inverter Technology for extreme savings at partial load

Wireless Remote

Wired Remote for Group Controller (Optional)

10 YEAR WARRANTY ON INVERTER COMPRESSOR

5 YEAR WARRANTY ON INVERTER OUTDOOR PCB

FREE STANDARD INSTALLATION

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit. \*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 90 for specific model-wise features.

# EFFICIENT & TROPICAL INVERTER

## CGA Series

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit. \*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 91 for specific model-wise features.

# TROPICAL INVERTER

## CGW Series

Star Rating:

Model Number:

ASGG12CGWA-B

ASGG18CGWA-B

ASGG24CGWA

Tropical Product Design

Double Swing Automatic-3D Airflow

Wide Voltage Range 195V ~ 265V

Conformal Coated PCB for Long Life

Blue Fin Condenser

Powerful Mode

Indoor Unit Temperature Display

Self Diagnosis

Integrated ON - OFF Timer

Quiet Operation

Backlit Remote

10 YEAR WARRANTY ON INVERTER COMPRESSOR

5 YEAR WARRANTY ON INVERTER OUTDOOR PCB

FREE STANDARD INSTALLATION

Wireless Remote

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 91 for specific model-wise features. CGW Series does not include installation piping kit.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit. \*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit.

\*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 92 for specific model-wise features.

# TROPICAL INVERTER

## CNW Series

Star Rating:

Model Number:

ASGG18CNWA-B

ASGG22CNWA-B

Tropical Product Design

Double Swing Automatic-3D Airflow (22)

Wide Voltage Range 145V ~ 285V

Conformal Coated PCB for long life

Backlit Remote

Coanda Airflow (18/22)

6 Speed Fan Control

Powerful Mode

Quiet Operation

### Anti-Corrosion Copper Heat Exchanger

Evaporator Epoxy Resin Coating

Blue Fin Condenser

Higher Moisture Removal Rate

Self Diagnosis

10 YEAR WARRANTY ON INVERTER COMPRESSOR

5 YEAR WARRANTY ON INVERTER OUTDOOR PCB

FREE STANDARD INSTALLATION

ASGG18CNWA-B ASGG22CNWA-B

Wireless Remote

NEVER USE THE OLD INSTALLATION PIPE FOR NEW SYSTEM.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit.

\*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 92 for specific model-wise features.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit.

\*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

# TROPICAL SPLIT

## BMA Series

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information is subject to change without prior notice. \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit.

\*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 93 for specific model-wise features.

# EFFICIENT & TROPICAL INVERTER CASSETTE

## CRT Series

Star Rating:

Model Number:

AUGG25CRTA-B

AUGG36CRTA-B  
(LCAC)

AUGG48CRAA-B  
(LCAC)

Tropical  
Product Design

Blue Fin Condenser

Connectable  
Distributing Duct

High Lift Drain Pump

Suitable for High Ceiling

Fresh Air Intake & Distribution Duct

Full Inverter Technology for extreme savings at partial load

Wireless Remote

Wired Remote  
(Optional)

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

# Information in above table is tentative and subject to change without prior notice \*1: Maximum operating current is the total current of the indoor unit and the outdoor unit.

\*2: Limit voltage drop to less than 2%. If voltage drop is 2% or more, increase cable conductor size.

# TROPICAL INVERTER WINDOW

## CHA Series

Star Rating:

Model Number:

AFGB14CHWA-B

AXGB18CHAA-B

AXGB22CHAA-B

Tropical Product Design

Super Wave Technology

Auto Restart

Tropical Spec 52°C

Conformal Coated PCB for Long Life

High Voltage Protection 700V (50ms)

Backlit Remote

Blue Fin Condenser

Wide Voltage Range 195V ~ 265V

3 Speed Fan Control

Integrated ON - OFF Timer

Blue Fin Evaporator

Self Diagnosis

10 YEAR WARRANTY ON INVERTER COMPRESSOR

5 YEAR WARRANTY ON INVERTER PCB

FREE STANDARD INSTALLATION

\*Specifications, design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Specifications are based on the following conditions; Cooling: Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB. Pipe length : 5.0 m Voltage : 230 [V]. All the models are designed to deliver higher cooling capacity than the rated cooling capacity. Piping can be extended to above length for full efficiency with additional charge of gas as per installation manual. The noise level is the value when measured in an anechoic room.

## REMOTE CONTROLLER FEATURES

- 1 START/STOP BUTTON
- 2 RESET BUTTON
- 3 TIMER BUTTON
- 4 SUPER WAVE BUTTON
- 5 FAN BUTTON
- 6 MODE BUTTON
- 7 SET TEMPERATURE (▲/▼) BUTTON
- 8 TEST RUN BUTTON
- 9 SLEEP BUTTON

\*Design and features are subject to change without prior notice for further development. The above models conform to energy labelling as per BEE regulation. Please refer page 97 for specific model-wise features.

# FEATURE EXPLANATION

**Condenser Protection Grill**  
Protects the condenser from damage.

**Wireless Remote Controller**  
For ease of operation.

**360° Turbo Flow**  
All round airflow in 360° direction.

**Filter Sign**  
Indicates the filter cleaning period by lamp.

**Connectable Distributing Duct**  
Can make extension of air supply.

**Weekly Timer**  
Different ON-OFF times can be set for each day.

**Self Diagnosis**  
Enables automatic detection of errors in the unit for easy trouble shooting.

**Washable Panel**  
Since the front panel is easy to remove, maintenance is easy.

**Silicon / Conformal Coated PCB**  
Silicon coating on PCB protects from dust, water and humidity.

**Up / Down Swing Flaps**  
The up/down flaps automatically swing up and down.

**Super Wave Technology**  
The unique design of the vertical louvers in front will enable the air sweep at wider angle for better distribution.

**Powder Coated Outdoor Unit**  
Powder coated body ensures extra protection from corrosion.

**Anti-Corrosion Heat Exchanger in IDU**  
Prevents refrigerant leak by coating the heat exchanger with an epoxy resin.

**Group Control System**  
A number of indoor units can be operated at the same time using a wired remote controller.

**Wired Remote Controller**  
Programmable wired remote, for ease of operation in busy commercial spaces.

**Tropical Spec - 52°C**  
Tropical design for high ambient operation upto 52°C.

**Tropical Spec - 55°C**  
Tropical design for high ambient operation upto 55°C.

**Temperature Display ON/OFF**  
The display on the indoor unit can also be switched on/off using the "LIGHT" button on the remote controller.

**Mildew Resistant Filter**  
Prevents mold formation.

**Connectable Fresh Air Duct**  
Fresh air can be introduced into the configuration by means of a duct.

**Left / Right Swing Flaps**  
The left / right flaps automatically swing left and right.

**Long Pipe**  
Easy and extended location of indoor unit to outdoor unit with full efficiency.

**Fresh Air Intake**  
Fresh air can be taken in by a fan which can be connected using an external control unit.

**Compressor Insulation Jacket**  
Sound insulation jacket and rubber mounting on compressor reduces the noise.

**Fan Speed Control**  
Number of levels of airflow control.

**Weekly + Setback timer**  
Weekly + Setback timer can set temperature for two time spans and for each day of the week.

**Power Airflow Dual Flaps**  
Can flatten out during cooling operation to deliver cool air to the corners of the room.

**Dry Function**  
Automatically reduces the level of humidity and maintains the preset temperature.

**BLDC Motor Indoor Unit**  
Specially designed Brushless DC motor for smooth & energy efficient operation.

**Inner Groove Copper Tube**  
IGT copper tube heat exchanger ensures better performance.

**Program Timer**  
This digital timer allows selection of one of four options: ON, OFF, ON→OFF or OFF→ON.

**Higher Moisture Removal Rate**  
Reduces humidity in the room by faster removal of moisture.

**ODU Low Noise Operation**  
Lowers noise from the outdoor unit by decreasing rotation speed of compressor and outdoor fan. (CK/KJ Series)

**Coanda Airflow technology**  
Cold air is discharged along the ceiling and is delivered far away for long reach and comfortable cooling, avoiding direct air blast on body.

**Energy Saving mode**  
This mode raises the set temperature slightly in the cooling mode to economically control the operation of the unit.

**High Voltage Protection**  
Designed to withstand surge in voltage upto 700V (50ms) and prevents the PCB from breakdown.

**Energy Saving with Human Sensor**  
Human sensor detects movement of people in the room and judges whether energy saving operation is required or not.

**Wide Angle Louvers**  
Smoothly curved wide angle louvers provide wide airflow coverage for effective cooling independent of indoor unit placement in room.

**Dual Suction Intake Design**  
Warm air is sucked in through dual intakes enabling larger volume of air to be cooled for fast and effective cooling.

**Economy Mode**  
Limits the maximum operation current, and performs operations with the power consumption suppressed.

**Quiet Operation**  
High efficiency fan construction and large independently driven diffuser ensures quiet operation.

**Corrosion Resistant ODU**  
The outdoor unit's heat exchanger fins are processed with special coating to avoid salt and acid corrosion.

**Integrated ON-OFF Timer**  
ON-OFF or OFF-ON timer can be set to suit your lifestyle.

**0.5°C Precision Temperature Control**  
Allows desired temperature setting in increments of 0.5°C for more accurate temperature setting.

**WLAN Adapter**  
The exclusive Wireless LAN adaptor (optional accessory) enables you to operate the air conditioner by smartphone or tablet PC.

**Blue Fin Condenser**  
Adoption of strong blue fin hydrophilic coated condenser provides protection against rust and salt damage.

**AFM Technology**  
Advanced Frequency Modulation Technology provides higher efficiency and better performance of the compressor.

**PM 2.5 Filter**  
Cleans the air by catching particles as small as 0.3 ~ 2.5 µm.

**Double Swing Automatic - 3D**  
Enables automatic swing in both horizontal and vertical directions, which enables 30 unique configurations

**Auto Restart**  
In the event of a temporary power failure, the air conditioner will automatically restart in the same operating mode as before, once the power supply is restored.

**Temperature Display**  
Displays indoor set temperature and indoor ambient temperature on the indoor unit.

**Automatic Airflow Adjustment**  
The micro-computer automatically adjusts the airflow effectively to follow the changes in room temperature.

**Sleep Timer**  
The micro-computer gradually changes the room temperature automatically for a comfortable night's sleep.

**Powerful Mode**  
Offers better air circulation and faster cooling by operating at maximum fan speed for 20 minutes.

**Blue Fin Evaporator**  
Adoption of strong blue fin hydrophilic coated evaporator provides protection against corrosion.

**10°C Heat Operation**  
Maintains the room temperature at 10°C, thus preventing the room temperature from dropping too low when not occupied.

**Coil Auto Dry Function**  
Indoor fan will operate at low speed for a while after turning off the unit by remote controller to prevent mold formation by drying the indoor unit heat exchanger. (BM Series)

**Backlit Remote**  
Backlit display on wireless remote controller enables easy operation in a dark room.

**Auto Moisture Prevent**  
In Cool / Dry mode if the vertical air direction louvers are operated outside the operating range of (1) - (3) for more than 20 minutes, they will automatically return to the (3) level in order to prevent moisture condensation and water dripping from the air outlet. This can be disabled by following simple steps as mentioned in the operation manual.

**Wide Voltage Range**  
Ability to operate over a wide voltage range to accommodate unstable voltage conditions.

**Symmetric Design**  
Its revolutionary design not only adds elegance, but also helps deliver exceptional cooling.
